SUMMARY

Computer Science engineer building decentralised systems, smart contracts, and full-stack applications. Published researcher in Ethereum-based social media architecture, with additional work in open-source supply chain security. Focused on products that give users verifiable control over their digital lives.

PROJECTS

Decentralized Social Media

FEATURED

Blockchain social platform where users post and tip using Ethereum. Posts live on-chain, content ownership is verifiable, tipping runs via smart contracts.

ReactJS

Solidity

Ethereum

Smart Contracts

Bad Snake — PyPI Malware Scanning

SECURITY

Research into PyPI's vulnerability to malware injection. Catalogued attack vectors and prototyped detection improvements for malicious Python packages.

Python

Malware Analysis

PyPI

Smart Medical Prescription

FULL-STACK

Cloud-based prescription platform for doctors and patients. Records keyed by unique codes, accessible from any browser via a web interface.

Web

MySQL

Cloud

SKILLS

Web Development

HTML · CSS · JS · ReactJS · Java · SQL

Systems & Languages

C · C++ · Python · Java · SQL · Solidity

Blockchain & Web3

RESEARCH

IJIRCE · VOL. 12, ISSUE 5 · MAY 2024

Decentralized Social Media Using Ethereum Blockchain

Published in IJIRCE. Proposes a decentralised alternative to centralised social media using Solidity smart contracts for content ownership and tipping.

EDUCATION
